## Governance HDHL JPI-CSA

Main decision making body of the JPI is the Management Board. In this board delegates of all participating countries in the JPI are represented.

The CSA has a double role: to ensure the secretariat of the JPI and to run the project.

The authority of the CSA to act as a secretariat of the JPI is ensured through a mandate of the Management Board signed by Management board delegates from each country.

## Next steps

January –March: national consultation on SRA and final SRA

February 2012 : kick of meeting of CSA in Rome

February-April: starting activity of SHAB on SRA and its implementation

January-June 2012: task force groups activity on implementation of joint actions starting from the first priority list

June 2012: adoption of SRA by MB and *First general conference* on JPI HDHL activity

*Diet and Physical Activity*

*Diet and Food*

*Diet and Disease*

## First JPI HDHL Conference

THE HAGUE JUNE 14TH, 2012

**SCOPE:** provide information on the JPI HDHL, create a discussion platform about targets and how to achieve them, launch the SRA and the pilot actions

**CHALLENGE:** to shift the focus from a defensive policy of combating illness to an offensive approach of promoting health.

**TARGET AUDIENCE:** stakeholders in the health and nutrition sector like politicians, policy makers, scientists, industry and Non-Governmental Organizations (NGOs).

Research Infrastructures for “Healthy Diet for a Healthy Life”

KBBE.2012.2.2-02 call: Study on the need for food and health research infrastructures.

*.. the infrastructure(s) would be able to support any envisaged Commission Recommendation on the Joint Programming Initiative that would address ‘A healthy diet for a healthy life’, and to better exploitation of sound scientific data and knowledge by the food industry.” (deadline 15/11/2011)*

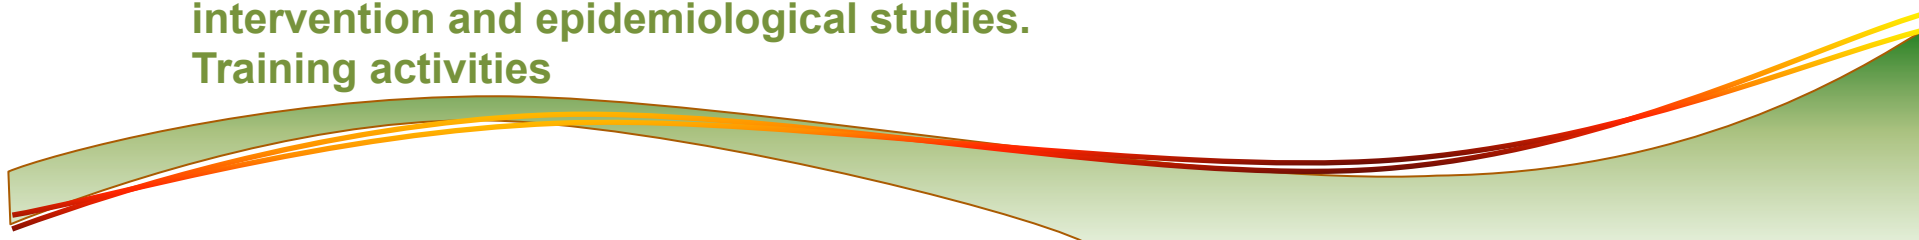

JPI HDHL recommendations:

Research infrastructure should facilitate the exchange of data in food and nutrition.

Randomly controlled dietary intervention studies and behaviour-change intervention studies on a long term perspective

Creation of a nutritional phenotype data base as an open access tool for all future intervention and epidemiological studies.
